# Comprehensive Vascular And Endovascular Surgery W/CD

## **Synopsis**

A team of nearly 80 internationally respected vascular surgeons and interventional radiologists deliver comprehensive, clinically focused coverage of all aspects of vascular surgery in an exceptionally well-designed single reference. Each disease chapter follows the same consistent format—*from basic science, clinical presentation and non-invasive and invasive testing through medical and surgical management to complications, outcome and follow up*—making information easy to access and easy to understand. More than 730 full-color photographs, line drawings and tables illustrate key concepts and procedures. And, a bonus CD-ROM features all of the book's illustrations for use in slide presentations. Focuses on the issues and challenges faced in everyday practice. Uses a highly structured, template format in each chapter to quickly and consistently delivers information on basic science clinical presentation — non-invasive testing — medical management — surgical management — complications — outcome — and follow up. Features over 720 full-color photographs, line drawings, charts and tables to make important information easy to comprehend. Integrates the basic sciences only where clinically relevant. Covers treatment and interventions from an evidence-based perspective, whenever possible. Presents short, clinical vignettes in the same style as those found on oral exams. Includes a bonus CD-ROM that makes all of the illustrations available for slide presentations. With 79 additional contributors

## **Book Information**

Hardcover: 728 pages

Publisher: Mosby (December 18, 2003)

Language: English

ISBN-10: 0723432325

ISBN-13: 978-0723432326

Product Dimensions: 11.3 x 8.7 x 1.7 inches

Shipping Weight: 6.2 pounds

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #1,947,029 in Books (See Top 100 in Books) #102 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Surgery > Vascular #331 in Books > Medical Books > Medicine > Surgery > Thoracic & Vascular

## **Customer Reviews**

True to the editors' goal of developing a practical text, the diagnostic descriptions are brief and

focus primarily on the appropriate use of noninvasive and invasive diagnostic tests, their interpretation, and their limitations. Almost no stone is left unturned in reviewing the various options for intervention available to the treating physician, whether endoluminal or open surgical or any combination thereof. *Annals of Vascular Surgery*, *International Journal of Vascular Surgery*, March 2005 "The aim of this book was clearly not to write another theoretical handbook of vascular surgery, but to provide a simple overview of all available medical, surgical, and interventional treatment options in a current vascular department. Thanks to the key points and to the clear illustrations, the editors have reached this aim; this makes "Comprehensive Vascular and Endovascular Surgery" a good reference guide for young vascular fellows and residents." *Acta Chirurgica Belgica*, August 2010

The Lead Editor of this proposed title is Jeb Hallett, who is based at the Mayo Clinic in Rochester. There he holds the position of Associate Dean for Faculty Affairs, the Director of Education for the Department of Surgery, Professor of Surgery, and the Director of the Mayo Gonda Vascular Center, an outpatient center at Mayo which performs over 6000 consults per year. He was an examiner for the American Board of Surgery between 1992 and 1998, is a member of the Advisory Council for Vascular Surgery for the American College of Surgeons, and is a member of the program committee of the ISCS, which he will chair in 2002. Prof Hallett originally trained as a journalist. He was voted Teacher of the Year in Surgical Specialties by Mayo students in 1999. Jeb has written 4 books, as well as contributing to Strandness and van Breda and Rutherford, and is an editor on the board of the Journal of Vascular Surgery. He has an excellent reputation as one of the front runners in American vascular surgery and his name and institution will be a great asset to this book. Professor Joe Mills is the Chief of Vascular Surgery at the University of Arizona, and the Director of the Vascular Fellowship Program. He has a reputation for being good, solid and reliable. He is well known in American Vascular Surgery, will chair the program committee of the Society of Vascular Surgery in 2001, and writes questions for both the written and oral parts of the Boards examination. He has just published a book on Management of Chronic Lower Limb Ischemia with Edward Arnold and is also on the editorial board of the Journal of Vascular Surgery. Jonathan Earnshaw trained at Guy's Hospital and was the Royal College of Surgeons Hunterian Professor during 1992-1993. He is the current chairman of research of the Vascular Surgical Society. He is a Surgical Tutor for the Royal College of Surgeons and has been an associate editor of the British Journal of Surgery since 1995. He recently self-published a book on evidence-based vascular surgery, and has a special interest in this area. He has a good reputation in British vascular surgery and again is seen as

someone who is hard-working, a meticulous editor and reliable, someone who "gets the job done". Finally, Jim Reekers has recently become a Professor of Radiology at the AMC in Amsterdam. He is young, dynamic and highly motivated. Dutch interventional radiology is verywell funded and many of the cutting-edge studies originate from The Netherlands. Although European practice varies widely from country to country, particularly in relation to intervention and treatment, The Netherlands is closest to the UK in approach. Prof Reekers has been brought onto the project to comment on the Endovascular sections and to help lend an international flavour to the book.

This is a very readable book, especially for busy vascular fellows. Plenty of pictures to speed up understanding and consolidate memory. Quite comprehensive also. It is not Rutherford but is a useful adjunct to understanding the daily procedures. Vascular Fellow.
