We started fishing late last year with out knowing anyone else who fishes. We were able to get some info from helpful folks at tackle/bait shops and some other fishermen out on the lakes and rivers. We came across this book at a book store and decided to buy it online afterwards. It is full of great info for newbie fishermen or fishermen new to the area. It includes detailed maps of where you're more likely to catch some fish. I also liked that the author included nearby bait shops.

This book details local fishing spots and where to find each species of fish in the area. It would be nice if it had some specific tips and techniques for each location, or even species.

Good Book.
