Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

This is a wonderful book for children to be read and later to read. I bought this for a child for an upcoming birthday. I was surprised to see how much I didn't know about some of these bugs. There are one or two bugs for every letter of the alphabet described in simple words, beautiful and realistic photos and drawings with a few facts about each bug. This is a wonderful book about bugs for kids of all ages. It contains one or two bugs for each letter of the alphabet. There are realistic pictures of each bug and a few facts about each bug. I learned things about several different bugs that I didn't know. It is written in plain words any child can understand. I purchased binoculars to go with the book. You never know where a child's interests may lie or what kind of profession they will decide on, I like exposing them to any learning experience that is also fun. It is meant for kids 3 and up but you can read it to them, just don't let them eat it!

The book was the perfect gift for my 3 year old grandson who loves bugs. He was so happy when

he saw it.

My son is a big bug freak! I have 4 kids and 3 Are bug freaks! But my son that I gifted this to as part of his bday gift.....realllllly enjoyed it! Along with bug catchers, nets etc. I might as well prepare him since me yelling at him to not catch every bug in the yard works! Lol it's All about bugs! Bugs Bugs Bugs! Ugh! Lol it's a cute book for sure.

This is a companion for the Melissa and Doug Sunny Patch Blossom Magnifier. It's a nice little book with wonderful close up graphics and some (not too much) information about each entry. Nist are common to our area and I'm sure my granddaughter will have a gas finding them--and many other wonderful things!

My son loves this book! We got it along with a bug-keeper since he loves to explore nature. He's not reading yet, so we read it to him, and we've learned a bit along with him. Great realistic pictures, but not ones that will give you nightmares.

This made a great gift! It was a true hit with the toddler who received it.

This book is great for a small child 3-5 yrs interested in bugs. The pictures are beautiful but could stand for a bit more variety. Very simple for beginners. My little boys definitely enjoy it.

My 3-1/2 year old grandson loves this book. He is obsessed with bugs right now and to learn them with the alphabet is super. He wants toknow more about most bugs so we are on the computer afterwards researching. Such a great time together.
