Presented in an appealing, easy to read manner, this book would keep a 9-10 year old interested in a wide range of facts. From animals on land, creatures in the ocean, to tallest peaks, population of major cities, information is put across in interesting, to-the-point snippets. Highly recommended!

My 10 year old has been getting this book every year for the last few years and it never disappoints! He is fascinated by the facts and pictures. It is both fun and educational. A great purchase

This is a review inspired by my 9 yr. old nephew who couldn't wait to have this edition as he was over the moon with the 2013 edition. He loves reading about a myriad of topics and can't seem to get enough of these info packed books.

These are awesome. Save yourself the boredom of reading the same story every night to your kids. This one will keep you interested and learning too.

Awesome!!

She absolutely loves it. She received large cards of animals and always shows them to me. She is learning to love and respect animals and their differences.

Bought this for my grandson, he loves to read and really enjoys this.

A great resource at a good price. Thank you.
