Regularly priced at \$4.99. Read on your PC, Mac, smart phone, tablet or Kindle device. This book will help you better understand school and children bullying, and see how you can deal with it. It has been written as a general overview outlining the main things you need to know about this subject. It's a short read and a great start for people who know little about the subject. Bullying is the act of continual abuse where one party tries to enforce its power over another. There are three types of bullying-physical, verbal, and relational (or social). Physical bullying occurs when the bully uses physical power or violence to coerce, intimidate, or harm the victim. This is usually the easiest form of bullying to identify and see the effects of, which is why it is often thought to be the most serious and the most commonly responded to in schools. Verbal bullying is when a person consistently uses words to intimidate or hurt another person. This can involve put-downs or verbal coercion. Verbal coercion is also fairly easy to spot, although many are not quick to respond to it, often misled by the false "sticks and stones may break my bones, but words will never hurt me" saying. All too often, bullying has been treated as a part of growing up, or something that will toughen. Recently, there have also been multiple suicides blamed on bullying. These must be stopped, and the only way to do so is by installing preventative programs in schools throughout the country. Even one suicide due to bullying is too many. This book will help you understand, prevent or detect this problem. What you are about to learn...

Customer Reviews

This book was a quick and easy read, but it was very thorough and to the point. It goes deep into bullying on both sides, whether your child is the victim or the bully. The author does an excellent job in discussing bullying in all its forms, including those committed online. He also touches on everything from what signs indicate potential bullying, the effects this has on children, where it takes place, and how to approach this problem. If you feel your child may be the victim or aggressor of bullying, I highly recommend arming yourself with this book. It's terrible that this form of abuse even exists. I thank God for people like Craig Donovan who is doing his part to become part of the solution to this problem.

What can a parent do to ensure that their child can stand up for himself or herself in the event of a bullying episode? And should a child be the victim of an unfortunate incident, what should a parent do to minimize the damage to their kid's development? Lastly, how should a parent react upon finding out that their own child is the one bullying others? If you are looking for the answers of these questions, must read it. The best thing I like about this book that it not only

answers to issue of becoming a victim or a parent of a victim but it also raises the question of taking up responsibility of a bully living under your own roof.

This book contains wonderful information for outlining and detailing what bullying is and how you should deal with it. If you think your child is the victim of a bully, this book is for you! I highly recommend this book.

All the information in this book is an easy search on the Internet. It is short and too general. Not even the recommendations are very helpful.
