Age Range: 6 - 9 years

Grade Level: 1 - 4

Customer Reviews

Grade 2-4-These books open with a description of the animal or insect, followed by a discussion of the meaning of the term "life cycle." Then, life stages are highlighted and clearly explained scientifically. How humans are adversely affecting the creatures' lives and what students can do about it are also discussed. An abundance of clear, colorful, attractively bordered photographs and illustrations enhance the fact-filled texts. These well-written titles will be used for research and pleasure reading.Sandra Welzenbach, Villarreal Elementary School, San Antonio, TX Copyright 2002 Reed Business Information, Inc.

Very informative and a lot of detail. Very up to date as far as pictures and colors . It worked well for my kindergarten and first grade kids . I used this in conjunction with the Insect Lore butterfly caterpillars that you send away for.

Fun educational book.

I used this book for a life cycle unit in my third grade class. We all enjoyed it and learned many new facts that many books leave out! It was the perfect level for my students!

Best I have seen on the subject!!!

This book is wonderfully written for kids 9-12 years old. It has mostly live photographs and also includes well done, interesting illustrations, bold print of key words, plus the monarch is one of my favorite butterflies. Here are the contents:

- 1 BEAUTIFUL BUTTERFLIES (Nineteen species of butterflies shown.)
- 2 WHAT IS A BUTTERFLY? (Keywords: insect, thorax, abdomen, antennae, compound eyes, nectar, proboscis)
- 3 WHAT IS A LIFE CYCLE? (Monarchs live longer, those born in the spring live four to five weeks but those born in the autumn live for several months.)
- 4 THE MAGNIFICENT MONARCH (**Monarchs need milkweed! If there are no milkweed plants in an area, there will be no monarchs either!)
- 5 HUNGRY CATERPILLARS (Key words: tentacles, spinneret)
- 6 TOO BIG FOR ITS SKIN (Keywords: molt, face mask, instar)
- 7 TAKING A WALK (Button)
- 8 AMAZING CHANGE! (Keywords: dissolves, emerge)
- 9 A COMPLETELY NEW LOOK (Keywords: metamorphosis, form)
- 10 MALE AND FEMALE (Males have a dark dot on each of their hind wings. The dots make up the scent scales. When a male is ready to mate, it rubs its scent scales with its hind legs which creates a scent that attracts females.)
- 11 FLYING SOUTH (Since they must travel so far, they often glide, or let the wind carry them.)
- 12 MONARCHS IN DANGER (**Monarchs lay eggs only on milkweed plants. If they cannot find healthy milkweed, monarchs will not lay eggs. People build roads and buildings on fields where milkweed grows and they kill milkweed because they think it is ugly. Get a group of friends to help you plant milkweed or move it from gardens to wild areas.)
- 13 WELCOME BUTTERFLIES! (Keywords: pollen, pesticides)
- 14 RAISE A MONARCH (You will need:...)
- 15 Glossary and Index

Soar!
