The Architect's Apprentice: The Story Of The Design And Construction Of A Wooden Sailboat

Synopsis

After his classic cutter became unfit for ocean sailing, the author decided to follow his dream and have a new custom-designed sailboat built out of wood. The experiences that follow make a story as interesting as any sailing yarn. With clarity, warmth, and humor he shows the beauty of a naval architect's drawings, and then the glue and sawdust as those plans generate the structure of a boat.

Customer Reviews

This well-organized book will be helpful to anyone considering custom boatbuilding. -- SAIL Magazine, December 1998

Gary Schwarzman is a writer and sailing enthusiast

"Small" non-fiction books can be real literary gems that transcend their subject matter. Jim Paul's "Catapult - Harry and I Build a Siege Weapon" and Mark Kurlansky's "Cod" are good examples of literary non-fiction wherein obscure topics are presented in a way that shows real wit and insight into the human condition. I'll never build a trebuchet or fish commercially, but by God I did enjoy being in those worlds while turning the pages. The Architect's Apprentice isn't one of those books, which limits its appeal to anyone who doesn't share a passion for sailing. It's a frank, honest discussion of the process of building a custom sailboat, from dream to delivery. Part process guide and part confessional, the book examines every aspect of building a new boat and the pitfalls therein. It clearly details the relationships between owner, designer, and builder, and is unsentimental about

the flash points. It's a fast read and, for sailors, generally a fun one. But it isn't one I'll re-read for the pure joy of it. Rather, it should be considered a good reference for anyone pondering construction of a custom boat. The boat in question here is wood, but the concepts presented should also serve those considering a custom composite or even a customized production boat. The Architect's Apprentice is good resource. It just isn't art.

THE ARCHITECT'S APPRENTICE is a book about the conception, design, and construction of a dream that became a beautiful wooden sailboat. More than that, however, it is a book about people involved in the process of bringing an idea to reality. Being human, they do not always have the same agenda, and the author skillfully builds a fascinating account of their personalities, interactions, and conflicts. There is not a happy ending for all of them. Anyone who enjoyed Tracy Kidder's best seller HOUSE, will enjoy this book.
