Customer Reviews

Caren Van Slyke is a nationally recognized expert on the GED Test. She has been involved in GED Test preparation for more than 30 yearsÂ¢âas an instructor, national teacher trainer, writer, and editor.Â Â She is founder and president of Learning Unlimited, which has developed dozens of study materialsÂ Â for the GED Test. Caren and the Kaplan content team have developed this study guide to meet theÂ Â challenges of the new GED Test launched in 2014.

This is a great study book! It has a ton of practice questions that helped me figure out what I did and did not know. If you want to get tons of GED practice questions and refine your test-taking, this book is for you! It has already definitely helped me! . Another great study aid that really helped me with the GED isÂ Â Neutropix ÂfÂ¢Â âÂ â Support Brain Function, Memory, Attention Span, Concentration & ClarityÂ Â it is an amazing supplement that enhances your memory, focus and cognition, great for studying.

This actually comes with an online component, as well as the book, which includes two practice

tests with rationales, Though it is thick, once you start reading through it, you realize it's not nearly as intimidating as it looks. A good portion of it is the test, with lots of empty space, room for graphics, and rationales that you may or may not even need to read. There's a website online, and don't worry about a lack of a code- on registration it will have you look up a page in the book and give a word that's easy to find. Then there's a shopping cart, but the balance will be 0.00 so there's no more cost. The book also helps with instructions on how to register and schedule your test. Since this book came out, in a lot of states passing scores have dropped from 150 per section to 145- if this includes your state, it will let you know that when you go to this GED testing site that the book lists. Georgia happens to be one of those states. Other than that, and that did just change in the last couple of weeks- everything about the book seems very current and updated. Just don't let the size of the book intimidate you. My son decided to break the test down into 4 sections since it costs the same no matter what, and that's what the people at the test center recommended to him. The book makes it easy to concentrate on one section of the test at a time if that is what you wish to do too. I trust Kaplan. I got my nursing license using Kaplan's test prep, and I was so prepared that I blew through the test so fast I thought surely I'd missed a large segment of it somehow. All my instructors always said if you can pass the Kaplan practice tests, you'll have no trouble on the real thing.

This was the only thing I studied taking the test for the first time, and passed.

Great help. I did pass my Az GED test.

Yes, it was extremely informative!

Feeling very confident that I will pass all 4 parts of my GED test when I finish this book. I think I will take my test in fragments so that the information is still fresh on my brain.

homeschooling made easy. Prepare for the GED in your own time. The book has practice tests, tutorials, and is well worth the price.

I had it for a week as a study guide and took and passed my math test on the first try. I had already took the other parts. It broke everything down step by step. It did what alot of math teacher's couldn't do for me. I highly recommend it.
