The Development Of Children And Adolescents: An Applied Perspective

Synopsis

The Development of Children and Adolescents, by Penny Hauser-Cram, J. Kevin Nugent, Kathleen Thies, and John F. Travers, provides an integrated view of child development. Presenting the most pertinent research for each developmental stage and linking this to practical applications in the areas of Parenting, Policy, and Practice, this balanced approach emphasizes the relationship between research and theory and applications. The rich media program, including WileyPLUS with Real Development promotes active learning and allows for increased understanding and comprehension of the course content. Real Development, authored by Nicole Barnes, Ph.D., Montclair State University and Christine Hatchard, Psy.D., Monmouth University, uses authentic video showcasing real families, along with activities and assessments that put students in the place of a professional, to gain an understanding of key concepts. Through the combination of text and media, students are engaged in meaningful learning that deepens and enriches their understanding of developmental concepts. WileyPLUS sold separately from text.

Book Information

Customer Reviews

This book arrived in excellent shape, and has gotten me through the semester.

The book came earlier than I expected. The book I have is used, you can tell its used but its not bad. The sides of the cover is bent but the inside is really good. There is no writng or highlighting. The price is also reasonable.

Great book, definitely not eligible for Prime (even though the product description says that it is). Took 5 days to get here... Very disappointed.

we needed this for a class but long delivery

helps students

good service, price, and product!

great condition

Nice
