Customer Reviews

I will say that normally I don't like books like this, but that being said, I certainly found this one captivating and am glad I read it! This collection of stories will leave you wondering exactly what might be "out there" or what might be going on in our own backyard so to speak. I was especially intrigued by the story by Justin Sloan called Bloodbag Suppressors. This is a tale about evil aliens who glow bright gold. We go into battle against them with the help of vampires. This is a very interesting story and makes me wonder exactly what goes on in Mr. Sloan's brain that he comes up with some of these. I read another short story by him where humans were pets for aliens! I still can't get that out of my head. He certainly has a very creative mind and I absolutely LOVE reading what he writes! Another favorite in this collection is The Forever Family by J.N. Chaney. I can absolutely see something like this device either being or already having been created. I love that it was created to provide a happy family. I really liked this story and hope to read more by this author. This book is a great collection to read. Some stories will make you grit your teeth, some will make you want to hide. Some will make you wonder. Do yourself a favor, buy this and read it! It's definitely worth it!

Good collection of short stories that left me wanting to read more. A wide variety of interesting characters and situations that ended too - for me.

This book has a lot of different stories within it. Some are long, some are short but each one was good. It's a bargain for the price. I Recommend It!

Very nice collection! I particularly liked "The Embrose Contract" by CC Ekeke, "The Trenches of Centauri Prime" by Craig Martelle, "Planetstrider" by Chris Fox, "Tombstone" by Jay Allan, and "Last Survivors" by Michael G Thomas. A number of the other stories were rather dark or sad. I like upbeat endings best.

Meh. It was okay. Typical anthology. Some good, some bad, and one or two great.

Unfortunately the good and the great stories did not suffice to bring the book to more than an ok.

Good collection of science fiction stories. I particularly liked "Starlighter" by Michael G. Thomas and "The Trenches of Centauri Prime" by Craig Martelle.

This was a good collection of stories and it was good to experience so of the other writers out there.

some are good,some are so-so,no stinkers.worth the purchase
