What can I say, the kid likes it. Much cheaper online, than in the malls.

This latest set introduces some more veteran versions of our favorite characters, while introducing some new faces to minis. The faction that seems to benefit most from Legacy is the Galactic Alliance. Kyle Katarn is just a beast, especially if you include Spirit Luke. Cade Skywalker from the Legacy comic makes a very strong mark on this game. This is not the best set to start with, but is a very good set to tide us over until the Knights of the Old Republic set that comes out in August.

High quality minies from the Legacy series comics, as well as the Legacy of the Force series of

books from DelRey books. Most characters have been created to some degree of accuracy. Some characters from other story arcs have been included, which doesn't make the most amount of sense, considering the fact that they do not show up in either the books or the comics. It would have been nice to see characters from the Dark Nest trilogy, seeing as how most of those characters return in the Legacy of the Force series to reprise their roles. I find it disappointing that there are no large or huge size minies included like a Krayte Dragon, or a Chiss Claw craft... It would have also been nice to see a "ships of Legacy" pack too fill in what's still missing from the RPG saga edition books. There are a few beautiful minies, but at the end of the day you are left unfilled.
