Grade Level: Kindergarten - 2

## Customer Reviews

Brighter Child workbooks help children build a strong foundation for learning. Fun activities and colorful practice pages reinforce essential skills and concepts. With Brighter Child Handwriting: Printing, you can help your child master basic writing skills for school success. Inside this book, find activities that teach: writing uppercase and lowercase letters; combining letters to make words; combining words to make sentences.

This is a learning to write book. It has 3 sections. 1st section is the letters of the alphabet, 2nd section has words starting from each letter of the alphabet and 3rd section has sentences. It is thin and there is only one page for each letter. Also you can easily remove the pages and copy them

I have a granddaughter that is on the autism spectrum and developmentally delayed. One of the things she struggles with is getting her letters in uniform sizes with correct spacing . Unfortunately the school does not work with her on these issues. So I got her this book along with a special pencil to help her practice. These "lessons" are just the right length....not too long nor too short. She has a difficult time paying attention for long periods of time. When she sees herself making the letters in the right size, she is so delighted with her accomplishments. For those of you who might be in the same boat as this grandmother is, I hope this will help you to decide on whether this book has value for your child.

I'm hung up on M. That's the dumbest way to teach a kid how to write big M!!! I'm certainly not going to teach my kids how to write M as shown on this book.

Love this book. It's not too thick, so its not daunting. It gives ample space for a child to practice each letter. Too bad my little guy hates writing.

My 4 year old, who normally hates writing, uses this in conjunction with writing videos. Of course he's still super obstinate about writing "his way" but the workbook saved me a lot of printing.

Perfect for summertime practice for my kids in handwriting, it is a large book with quite a good amount of pages, I got one for each son and they have already started to use it.

Includes half page of lines for each capital letter, then half page of lines for each lower case letter. In the back, includes sentence practice. Nice book for a child learning to write.

Great product kid couldn't wait to start the book
